Our business is built on understanding the needs of our clients

Since 1978, our business has been dedicated to solving industrial wastewater problems.

Dynatec’s objective and commitment is to guarantee customer satisfaction by providing comprehensive integrated solutions and supplying high quality equipment and systems for the treatment of industrial and commercial wastewater. We have solved a broad range of wastewater problems. The solutions have included systems as simple as pH control or oil/water separation, to full-scale chemical/physical, biological and membrane systems (microfiltration, ultrafiltration, nanofiltration and reverse osmosis). Dynatec designs and provides systems to produce the desired performance at the lowest overall operating costs.

Our engineering expertise, experience and technical capabilities combined with continued support during and after the completion of a project has allowed Dynatec to achieve successful, cost effective results for many Fortune 500 Companies.

Dynatec understands successful system performance and implementation. The key to any treatment system is the thoughtful integration of the best available technologies. Our scope of supply is comprehensive and can include all functions and disciplines involved in the design, manufacture and supply of wastewater treatment systems.

Systems, Products and Service

Dynatec offers standard packaged systems or non-standard integrated engineered systems to meet the many diversified needs for today’s wastewater treatment requirements. Typical projects for standard and non-standard engineered systems have included the following:

- Design/Build/Own/Operate/Maintain (DBOOM)
- Contract operations
- Discharge compliance
- Fluid purification, recovery and reuse
- Sewer, ground water, surface water, discharge systems
- Outsourcing services
- Turnkey installations
- Water and wastewater filtration and purification
- Water recycling
- Zero liquid discharge

Please contact our sales department at 609-387-0330 or online at sales@dynatecsystems.com to discuss your project.

Please visit our web site at www.dynatecsystems.com for much more information.
Our determination to provide clients with the best possible systems for water treatment and wastewater applications makes Dynatec the logical choice for those who want comprehensive solutions to solve their treatment problems the first time.

**Problems Solved—Solutions Provided**

- BOD/COD reduction
- Chemical recovery/reuse
- Color removal
- Metals removal and/or recovery
- Oil removal
- Organic reduction
- Suspended solids separation
- TDS removal
- Turnkey installations
- Water recycling

**Technologies**

- Chemical pretreatment
- Enhanced gravity separation
- Membrane bioreactors (MBR)
- Membrane separation systems
- Ultrafiltration
- Microfiltration
- Nanofiltration
- Resin adsorption
- Reverse osmosis
- Sludge treatment and dewatering

**Outsourcing Service**

Dynatec Systems can provide complete turnkey system including engineering, design, system supply, installation, operation and maintenance based upon a per gallon charge. No capital expenditure is required. The customer provides space for the treatment equipment and utilities to operate the equipment. Dynatec Systems provides everything else including treatment to agreed standards in agreed volumes, maintenance, operation and repairs and waste disposal. This service provides predictable waste treatment and disposal costs based upon a multi-year contract.

*For each application, Dynatec selects the membrane that will provide the most cost effective long-term solution.*
